Two New Tenure Track Positions added to Department Roster

Do you know how the department ranks in terms of size according to the American Society of Engineering Education (ASEE)? Do you know the average number of Ph.D.'s awarded over the last six years? What about the department faculty's average h-index? What about those two new tenure track positions – have they been filled? And finally, how did the 50,000 students rank the department's educational program?
